**eFigure 1.** Time Series of Daily Cardiovascular Disease (CVD) Mortality by Age Group in New York City, 2006-2012

**eFigure 2.** Time Series of Daily Emergency Department Visits for Influenza-Like Illness (ILI) by Age Group in New York City, 2006-2012

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure 1. Time Series of Daily Cardiovascular Disease (CVD) Mortality by Age Group in New York City, 2006-2012. Counts were smoothed using a 7-day centered moving average.
Figure 2. Time Series of Daily Emergency Department Visits for Influenza-Like Illness (ILI) by Age Group in New York City, 2006-2012. During the first wave of the 2009 H1N1 pandemic, emergency department visits spiked among infants, teens, and adults age 18-64 years, but not among adults age ≥65 years.
