Supplementary Online Content

**eFigure 1.** Multiple, symmetric, sharply demarcated hypopigmented macules of nearly similar size and shape over the forearms and hands (patient 1 as described in Table 1)

**eFigure 2.** Close view of left arm of a boy showing sharply demarcated discrete hypopigmented macules of the similar shape and size (patient 3)

**eFigure 3A.** Close view of the lesions on thigh of patient 2 showing sharply demarcated discrete hypopigmented macules of the similar shape and size

**eFigure 3B.** Multiple symmetric hypopigmented macules over the dorsi of feet of the same patient

**eFigure 3C.** Multiple symmetric hypopigmented macules over the knees of the same patient

**eFigure 3D.** Multiple hypopigmented macules, conglomerated at places, over the right cheek the same patient. He had symmetric involvement on the contralateral side.

**eFigure 3E.** Multiple, circular, demarcated hypopigmented macules on dorsum of right hand with fine scales.

**eFigure 4A.** Multiple, symmetrical, hypopigmented macules of similar size on the forearms of a boy (patient 5)

**eFigure 4B.** Multiple symmetric discrete hypopigmented macules over the knees of the same patient

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure 1. Multiple, symmetric, sharply demarcated hypopigmented macules of nearly similar size and shape over the forearms and hands (patient 1 as described in Table 1)
**eFigure 2.** Close view of left arm of a boy showing sharply demarcated discrete hypopigmented macules of the similar shape and size (patient 3)
**eFigure 3A.** Close view of the lesions on thigh of patient 2 showing sharply demarcated discrete hypopigmented macules of the similar shape and size.
